

DBK Drymatic Floor System

Targeted Heat Drying... At Its Finest

The DBK Drymatic Floor System is designed to efficiently control the heated airflow created by the DBK Drymatic Boost Box.

The patented system uses micro-jets of warm, dry air to break the boundary layer of moisture at the surface of a water damaged material. The controlled heat generated by the DBK Drymatic Boost Box is then driven into the structure, increasing the core temperature and increasing the diffusion rate of the bound water.

The DBK Drymatic Floor System, combined with the Boost, is the most effective target drying system on the market.

Features:

- Lightweight and portable
- Reduces waste to landfill
- Requires no fixing to structure
- Reduces volume of air being managed, maximising performance
- Washable and long-lasting
- Flame retardant material
- Saves energy, time and strip-out
- Roll out, connect and go!

TECHNICAL DATA

Available Sizes (W x L)	1.0m x 0.5m
	1.0m x 1.0m
	2.0m x 0.5m
	2.0m x 1.0m
	2.0m x 1.5m
	3.0m x 0.5m
	3.0m x 1.0m
	3.0m x 1.5m
	3.0m x 2.0m
Fastening Method	High Strength Velcro
Joinable	Yes
Maximum Operating Temp	80°C
Washable	Jet Wash, Steam Clean or Machine Wash

Custom sizes are available on request
Please contact for more information

PRODUCT DESCRIPTION AND PRICING

Wall Drying Systems

FGPH014	1 Wall Mat (4m' x 1m) in a carry bag	£POA
FGPH051	1 Wall Mat (2m x 1m) in a carry bag	£POA
FGPH058	1 Wall Mat (4m x 0.5m) in a carry bag	£POA
FGPH085	1 Wall Mat (2m x 0.5m) in a carry bag	£POA

Floor Drying Systems

FGPH015	1 Floor Mat (3m x 2m) in a carry bag	£POA
FGPH016	1 Floor Mat (3m x 1.5m) in a carry bag	£POA
FGPH017	1 Floor Mat (3m x 1m) in a carry bag	£POA
FGPH057	1 Floor Mat (3m x 0.5m) in a carry bag	£POA
FGPH041	1 Floor Mat (2m x 1.5m) in a carry bag	£POA
FGPH036	1 Floor Mat (2m x 1m) in a carry bag	£POA
FGPH053	1 Floor Mat (1m x 1m) in a carry bag	£POA
FGPH054	1 Floor Mat (2m x 0.5m) in a carry bag	£POA
FGPH055	1 Floor Mat (1m x 0.5m) in a carry bag	£POA

DBK Drymatic Mat Joiners

Targeted Heat Drying... At Its Finest

We have developed a range of connections for the Drymatic Wall and Floor System and these ensure that the technician maintains flexibility when installing the equipment on site.

The systems are designed to be modular and they can be connected to one another to increase the distribution of heated airflow over a wider surface area.
